- Participated in project management, task tracking, and agile team collaboration.
- Gained experience in team leadership and frontend development workflows.

PROJECTS

RecycLinkSL

Oct 2025

(University Final Year Project)

- Built a web-based recycling management system with dashboards for Citizens, Collectors, and Admin users. Implemented dynamic pricing for recyclable materials based on category and weight, integrated pickup scheduling and route optimisation, and developed a bilingual interface (Sinhala/English) to improve usability and accessibility.
- Technology stack: React.js, TypeScript, Tailwind CSS, Node.js, MongoDB

Therapy Products Hub Website

Oct 2024

- Designed, developed, and hosted a fully responsive Shopify e-commerce website for selling reliable therapy products and care essentials.

Pegs&Hangers Website

Nov 2024

- Designed, developed, and hosted a fully responsive Shopify e-commerce website for a clothing brand selling a wide range of apparel items.

NexGen Cargo Website

Dec 2024 - Jan 2025

- Designed, developed, and hosted a fully responsive WordPress website for a logistics service platform.

NexGen Cargo Application

Jan 2024 - Mar 2025

- Designed the complete user interface for both the web portal and mobile app using Figma.

Lion Car Rental Application

Jun 2024 - Oct 2025

- Designed the complete user interface for both the web portal and mobile app using Figma.
- Developed the frontend interface for the original system. The application includes a booking workflow and multiple dashboards used by customers and staff.
- Technology Stack: Figma, React.js, TypeScript, Tailwind CSS, ClickUp

Sanni18 Restaurant Website

Aug 2025

- Designed, developed, and hosted a fully responsive WordPress website for a restaurant.

Gavino Website

Sep 2025

- Designed, developed, and hosted a fully responsive WordPress e-commerce website for selling bags.

ScamSensei Website

Sep 2023 - Mar 2024

(University Project)

- Developed a user-driven Scam Detector website with AI assistance to avoid scams and enable consumers to verify scams, discuss their experiences, and get immediate support.
- Technology stack: MERN

Football Club Detail App

April 2024

(University Project)

- Developed an Android application to provide detailed information about football clubs. Integrated the SportsDB API and utilised the Room Library for local data management, enabling robust search and display functionalities.
- Technology stack: Kotlin and Jetpack Compose

Estate Website

January 2024

(University Project)

- Developed a responsive client-side web application for property search by type, price, bedrooms, date, and postcode. Implemented interactive search and detailed property pages with images, descriptions, and a Google map.
- Technology stack: React.js, CSS

Theatre Booking System

March 2023

(University Project)

- During theatre sessions, efficiently handled reservations and availability for seats and showed proficiency in Java programming, which helped the theatre business run more successfully and efficiently.
- Technology stack: Java

ADDITIONAL INFORMATION

- **Technical Skills:** HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Java, Python, PostgreSQL, MongoDB, MySQL, Kotlin
- WordPress, Shopify, Figma, ClickUp, Git, MS Office
- **Awards & Certifications:** Front-end Web Development Online Learning - University of Moratuwa, Web Design for Beginners – University of Moratuwa, Java Object-Oriented Programming- LinkedIn Learning, All Island Inter-School under 18 doubles badminton team championship-Second runner-up (2015), Southern Province Open Badminton Team Championship-Semi-finalist (2013)
- **Extracurricular:** IX 24 Designathon - IEEE Student Branch, Informatics Institute of Technology Participant, Team 'dEsignYou' (2024), Problem-solving International Hackathon Competition participated - University of Westminster/IIT (2024), A Frontend Development Workshop Series participated - IEEE Computer Science Society Student Branch of IIT (2024), School Junior Prefect (2017-2019).
